It was in the form *chirk* that the word was applied to the voice of birds, for which the original *chark* was not used. (Here association with *chirm* may also have worked.) In this sense there further arose the variants CHIRT and CHIRF, the latter of which became the prevailing form.]

Chirne, obs. form of CHURN.

Chiro-, chir-, = Gr. χειρο- combining form of χείρ hand, appearing in Greek in a very large number of words; several of these were adopted in Latin with the spelling *chiro-*, e.g. *chīrographum, chīromantia, chīronomia, chīrothēca, chīrūrgia*, and have thus passed into the modern langs.; many more have been taken by these directly from Greek, e.g. *chirocracy, chiroscopy, chirosophy, chirotechny*, or formed from Greek elements and on Greek analogies, as *chiropodist, chirosopher*. In modern technical terms, esp. those of botany and zoology, the spelling is often *cheir-*, e.g. *cheiranthus, cheiroptera, cheirotherium*.

In words thoroughly naturalized in Latin, CH was treated as C, and had in Romanic the phonetic history of *c* before *i*: hence such medL. forms as *cirographum, cirogryllus, cirotheca, ciromancia, cirurgianus*, also written *cyro-*, and It. and OF. and Eng. forms in *ciro-, cyro-*. But, in most words, modern scholarship has restored the *ch*-spelling and *k* pronunciation: see however CHIRURGEON, SURGEON.

The more important of these derivatives follow in their alphabetical order; a few trivial ones are given here: **Chi·rocosme·tics** *sb. pl.* [Gr. κοσμητικός; see COSMETIC], the art of adorning the hands. † **Chi·rogram** [see -GRAM], used by Bulwer for a diagram illustrating chironomy. **Chirogy·mnast** [Gr. γυμναστής; see GYMNAST], an apparatus for exercising the fingers for pianoforte playing. **Chi·romys, cheiromys** [Gr. μῦς mouse], the AYE-AYE of Madagascar. **Chi·roplast** [Gr. πλάστης moulder, modeller], an apparatus devised by J. B. Logier in 1814 for keeping the hands in a correct position in pianoforte playing; hence **Chi·roplastic** *a.* **Chi·ropoie·tic** *a.* [Gr. ποιητικός making, f. ποιεῖν to make, do], ? surgical. † **Chiro-ponal** *a.* [Gr. πόνος toil + -AL], pertaining to or involving manual labour (*obs.*). † **Chiroscopical** *a.* [Gr. -σκοπος inspector, examiner], pertaining to palmistry.

Chiropodist (kəirˈpŏdist). [A factitious designation, apparently assumed in 1785: see first quots. Whether the inventor put together Gr. χείρ, χειρο- hand, and ποῦς, ποδ- foot, to indicate that hands *and* feet were the objects of his attention, or whether he had in view the ready-made Gr. χειρωνόδ-ης (or χειρόπους, χειρόποδ-) 'having chapped feet', does not appear. The latter would better justify his formation, the former better suit his meaning.

Gr. χειρόπους is founded on χειρ-άς a chap, properly of the hands (χείρ) but also of the feet (χειράδες ποδων).]

Chirr (tʃɜɹ, tʃɒrr, *dial.* and *Sc.* tʃɪr), *v.* [A modern formation naturally expressing a prolonged and somewhat sharply trilled sound: cf. *whirr, birr, burr, purr*; with *chirring* cf. the more ponderous *jarring*. As a recent onomatopœia, *chirr* was evidently largely suggested by the already existing *chirm, chirk, chirt, chirp, chirrup*, of which it retains the common phonetic element and the common kernel of meaning.
Along with the subsequently formed *chirl*, and the many derivatives of *chirp*, etc., these form a well-marked recent group or 'family' of words, which mutually illustrate and help each other's meaning. Thus *chirr* expresses continued and uniform trilled sound; in *chirk, chirt, chirp* this sound is abruptly stopped by oral action; in *chirrup*, a modulation is just dared before the stoppage; *chirl*, esp. in its northern form *chirtle*, suggests the passing of the *chirr* into a warbling modulation; while *chirm* with its suggestions of verbal sbs. in *-m* of divers origin, e.g. *scream, bloom, blossom, rhythm, phasm*, assumes the appearance of a derivative of *chir-*. If these words, instead of being nearly all recent, were of prehistoric formation, or of Aryan standing, *chir-* would certainly be assumed as the 'root', and the other words as out-growths from it.]
intr. To make the trilled sound characteristic of grasshoppers, etc. (Often nearly equivalent to CHIRP, but properly expressing a more continuous and monotonous sound.) Hence **Chirring** *vbl. sb.* and *ppl. a.*

Chirrup (tʃɪ·rʊp), *v.* Forms: 6 **cherip,** 7 **cherrip, cherrup,** 7–9 **cherup.** 7– **chirrup.** [Evidently formed from *chirp*, by trilling the *r*, and developing an additional syllable, to indicate a corresponding variation of sound. 1. A cutting tool of iron or steel with the cutting face transverse to the axis, and more or less abruptly bevelled on one or both sides; used for cutting wood, metal, or stone, and worked either by pressure, or by the blows of a mallet or hammer.

The ordinary carpenter's chisel has a wooden handle, and a plane face at right angles to the axis, bevelled on one side only; most of the stone-cutters' chisels are bevelled on both sides (or rarely on four sides); some chisels, as the gouge, have the plane of the face curved; others, used in turning, have the edge concave or convex.

Chive[1] (tʃəiv), also **cive** (səiv). Forms: 5 **cyves, -ys**, 5–7 **cyve**, 6 **chyve**, 6, 8 **sive**, (9 **shive**), 6– **chive, cive**. [In form *cive* a. F. *cive* = Pr. *ceba*:—L. *cēpa, cæpa* onion. The form *chive* prob. represents a North Fr. *chive*. (Cf. *rive*:—*ripa*; *cire*:—*cera*.)] It is probable that sense 2 is orig. the same word, though it never appears as *cive*, and early writers who regularly used *cive* for the plant, employed *chive* in sense 2.

In OE. *cīpe*, a. L. *cēpa*, still retained the sense 'onion' (also that of 'shalot' or 'scallion'); but in Romanic the name was extended and transferred to smaller species of *Allium*. In French, *cive* included (or perhaps still includes) 'several small species or varieties', besides *A. Schænoprasum*, to which the dim. *civette* (in Cat. *cebeta*) applies more exclusively. In Eng. *cive* or *chive* appears always to have meant this, *civet* being merely a rare, and now obsolete synonym. In French it is also called *ciboulette*, dim. of *ciboule* CHIBOL. Other OF. derivative forms were *civol, civon, civot*. The form *chive* is not recorded by Littré, but its existence in ONFr. may be inferred from the derivatives *chivon, chivot* (Godefroy). In Eng. *cive* and *chive* both occur from early times; but the former is the leading form, down to the present century. The phonetic corruption *siethe* used by Tusser, and interesting as exemplifying the interchange of *v* and *ð*, is still in familiar use in the south of Scotland. The modern prevalence of *chive* in the leading form is, perhaps, due to association with CHIVE[2], arising from the fact that it is for its slender leaves that the *chive* is cultivated. *Chived garlic* in 3 clearly points to this.]

1. The smallest cultivated species of *Allium* (*A. Schænoprasum*), which grows in tufts, with rush-like hollow leaves and small clustered bulbs. The leaves are cut for use in soups and stews. *Wild chive*: a name sometimes applied to the Wild Garlic or Ramsons (*A. ursinum*).

(Mostly in *pl.*) [Occurs first in the expression 'chives of saffron', which in Berthelet's reprint (1535) of Trevisa's transl. of Bartholomæus *De Proprietatibus Rerum*, takes the place of *chithe*, *chire* in the 15th c. MSS., *chire* in the ed. of Wynkyn de Worde (1495). As *chithe* is app the original word, *chive* appears to be an altered form, perhaps partly phonetic (cf. the form *siethe* in Tusser, *cīthe* in modern Scotch for *cive* = CHIVE *sb.*[1]), partly influenced by confusion with CHIVE *sb.*[1], this being an *Allium* of which only the *chithes* or slender thread-like leaves are used. The passage in *De Prop. Rerum* is a quotation from Pliny *H. N.* xxi. 5. § 11, 'stantibus in medio crocis', where 'crocis' has not the sense of 'saffron', but that of 'internal organs of other flowers analogous to saffron'; but whether the Eng. translator so understood it in rendering it 'chiues of saffron' is doubtful. Chlorine (klōˑrin, -əin), *sb. Chem.* [Named by Sir H. Davy in 1810, from its colour; f. Gr. χλωρός yellowish or light green + -INE³, Gr. -ινη, a feminine patronymic and derivative suffix. In F. *chlore*, Ger. *chlor* (without any suffix).]

1. One of the non-metallic elements; a yellowish-green heavy gas (condensable by pressure into a yellow transparent liquid), having a peculiar irritating smell, and very active chemical properties. Symbol Cl; atomic weight, 35·5.

It is not found free in nature, but is widely distributed in its compounds, chiefly in the *chloride of sodium* (common salt). The simple element was obtained by Scheele in 1774, but was at first supposed to be a compound body (*oxymuriatic acid*); its elementary nature was established by Davy in 1809-10. It has powerful bleaching and disinfectant qualities, and supports the combustion of many bodies. The name was taken as a specific one by Werner in 1789. In 1838 Von Kobell showed that Werner's name included more than one species, and restricted it to the hexagonal chlorite of St. Gothard, from which he separated *Ripidolite*: various other species have since been established, as *Penninite*, *Delessite*, *Leuchtenbergite*, *Clinochlore*, *Chloritoid*, etc., and as 'chlorite' has thus become a vague popular term, Dana has given the name of *Prochlorite* to the St. Gothard mineral on which Werner founded the species.

Chock-full, choke-full (tʃɒkful, tʃōu·kful), *a.* Forms: 5 **chokke-fulle,** (**cheke-full**), 8 **chocque-,** 7– **choke-,** 8– **chock-, choak-, chuck-full.** [The phonetic form and spelling and the derivation are alike unsettled, the uncertainty of the latter involving that of the former. In Dictionaries, first in Todd (1818) as *choke-full* (with mention of *chuck-full* as a 'corruption'). Subsequent dictionaries have *choke-full* as main form, with *chock-full* as a recognized variant. But the American lexicographers have *chock-full* as the standard form, with *choke-full* as a cross-reference; and this appears to agree with literary usage in U.S. *Choke-full* appears to be rather the more frequent in literary use in England; but *chock-full* is almost universal in spoken use; *chuck-full*, in literary use bef. and after 1800, is now only dialectal.

The uncertainty begins with the first appearance of the word as *chokke-fulle, chake-fulle* in the alliterative Morte Arthur, the spelling of which is very insecure. Conjectural derivations are from Choke *v.* (ME. *choke, chake*) with sense 'full to choking', or 'choked full' ; from Cheek (ME. *cheke*, Choke *sb.*[2]) or the related *chokes*=chops, fauces, with sense 'full to the chops'; from ME. Chok, *chokke* ? to thrust, ram in, in sense 'crammed full'. Either of the two former derivations would give an original long *ō* (which might perhaps, however, be shortened in the combination); the third would give short *ŏ* from the beginning. Prob. there is a recent association with Chock *sb.* and *v.*, in some of their senses, but the latter are too late to be the origin; it is more likely that these senses have been developed under the influence of *chock-full*: see Chock *adv.* In Eng. dial. glossaries, *chock-full* is recorded from Lancashire, Cheshire, Sheffield, Whitby, Holderness, Leicester, Warwicksh., Worcester, Berks, Kent; and correspondents send it as the current form in Cornwall, Somerset, Wilts, Surrey, Warwicksh., Staffordsh., Derby, Notts, E. & S. Lincoln, Rossendale, Westmorland, Durham, Northumberland, Scotland, 'all parts of Ireland', and 'among all English soldiers in the army'. *Chuck-full* is in the Holderness Gloss., and is reported from Norfolk, Suffolk, E. London, Oxford, N. & E. Devon. *Choke-full* appears to have no local status. As the local pronunciation is usually entirely distinct from that of *choke* (*chōȣk, chooȣk, chouk*, etc.), the two words are not associated, and app. have nothing to do with each other; *choke-full* being thus merely a book-spelling founded upon a conjectural derivation.]

Choir organ, chair organ. [The latter is the original name. *Choir organ*, if not a blunder to begin with, has often been wrongly substituted for *chair organ* in printing 17th c. documents; and thus, even writers of repute have erroneously alleged that it was the original. (See Hopkins and Rimbault *Hist. Organ* (passim); Hawkins, quot. 1776; Grove, *Dict. Music* s.v. *choir organ.*)] One of the aggregated organs (now usually three in number, the others being the *great organ* and the *swell organ*) which go to make up a large organ, having its row of keys the lowest of the three, and containing stops of a lighter character than the great organ; used for accompanying a choir.

5. The mass of immature florets with their scales and down in the centre of an artichoke head.

Choke (tʃōuk), *v.* Pa. t. and pple. **choked** (tʃōukt). Forms: 4-5 **cheke, [chekyn],** 5-**choke,** (6 **schoke**). Also 6-9 **chouk** (o; occas. 6-9 (esp. in *mod. dial.*) **chock,** 6 **chowke,** 9 *Sc.* **chouk, chowk,** 9 *dial.* **chuck.** Rare str. pa. pple. in 7 **choaken.** [The early history is obscure, the word being comparatively rare. The ME. variation *choke* and *cheke*, also found in ACHOKE, *achoke*, points back to an OE. **cēocian, acēocian*, of which the latter only is exemplified (Ælfric, *Hom.* I. 316). Possibly therefore *choke* is an aphetic form of *achoke*. No cognate verb appears elsewhere in Teutonic: but connexion with CHEEK *sb.* is perh. possible, at least if the latter had an OTeut. type **keukhn-*, since *acēocian* would also represent a stem **keuk-*. (The meaning of *cēoc-dāl* in *Leechd.* II. 310 is doubtful. ? *cheek-* or *choke-* illness.)

Association between the two words is suggested by the ME. double form of both, *cheke, choke*; in mod. Sc., *chouk* to choke, and *chouks* chops, fauces, external parts about the top of the throat (see CHOKE *sb.*2), are always associated in sense. The possibility of such a derivation is further illustrated by the verbs ATHROAT, THROTTLE, G. *erdrosseln*, L. *jugulare*, and by *querken*, given by the Promptorium as a synonym of *choke*: 'chekyn or qwerchyn (*v.r.* querken) *suffoco*; chekenyd or qwerkenyd (chowked or querkened) *suffocatus, strangulatus.*' This *querken* to strangle or choke is a deriv. of ON. *kverk*, OHG. *querca*, the angle below the chin, in pl. throat, fauces, = Sc. chouks.

The normal ME. repr. of **cēocian* was *cheke*; *choke* is explained by passage of OE. *cēo-* into *c ē-*; cf. *cēosan*, ME. *chese*, CHOOSE. The form *Cheken* in the Promptorium (see above), appears to be a derivative with *-en* suffix, like *cheapen, threaten.*]

I. *proper.* To stop the aperture of the throat so as to prevent breathing; to kill by so doing.

OF. *colre* and *colère*, inherited form, and later learned adaptation of L. *cholera* (in med.L. often *colera*), a. Gr. χολέρα, name of a disease, = Cholera (sense 2), and including perhaps other bilious disorders (mod.L. dicts. say 'jaundice'). App. (as stated by Celsus A.D. 50) f. χολή bile, though the formation is obscure and the derivation disputed; another sense of χολέρα was rain-pipe, gutter. With Celsus and Pliny, L. *cholera* retained the same sense as in Gr.; but in 3rd and 4th c. it was used by Lampridius and Jerome in the sense of Gr. χολή 'bile', also 'bitter anger,' and became the ordinary name of one of the 'four humours' of the physicians (*sanguis, cholera, melancolia, phlegma*), as in Isidore. In this sense alone the word survived in Romanic, It. *collera*, Pr. *colera, colra*, OF. *colre, colle, cole*, bile, anger. The last has been superseded in Fr. by *colère*, a re-adaptation of the L. word, of learned origin. Both Fr. types appear in late ME., where also the word appears to have been sometimes confused with *colour*, esp. in its association with *red*. In the 16th c. the spelling was refashioned after the original Latin.]

3. A malignant disease (not of bilious nature), endemic in India and from time to time epidemic in other parts of the world. It is characterized by violent vomiting, purging with watery rice-coloured evacuations, severe cramps, and collapse, death often occurring in a few hours.

(A terrible outbreak of this disease began in India in 1816–17, and, extending year by year over an increasing area westward, at length reached Europe in 1831 and N. America in 1832. After rivalling the great pestilences of former ages in the mortality which it produced, it abated, or retreated back to India, after 1837.)

In earlier use, and sometimes still, distinguished as *Asiatic, Catarrhal, Epidemic, Indian, Malignant, Oriental, Serous*, and *Spasmodic Cholera*; but since its first invasion of England in 1831–2 this disease has more and more appropriated the simple name

Cholera morbus, which originally belonged to sense 2 to distinguish it from sense 1, has also been in modern times vulgarly used to distinguish this from sense 2.

Choose (tʃūz), *v.* Pa. t. **chose** (tʃōuz), pa. pple. **chosen** (tʃōu·z'n). Forms: see below. [OE. *céos-an*, str. vb., belonging to the OTeut. ablaut-series *eu, au—u, u*. By reason of internal consonant-mutation (*s* to *s* and *r*), in OTeut. and WGer., and by OE. palatalization of *c*, the inflexion of this vb. presented, in the OE. and early ME. stages, various phonetic differences, which were subsequently levelled under the influence of analogy; while new phonetic or analogical influences changed the present and past stems in various directions, so that not one of its modern forms is the normal phonetic representative of the corresponding OE. form. The OTeut. inflexion was *keus-, kaus—kusum, kuzano-* (with original *s* changed to *z* by Verner's Law), Gothic *kius-, kaus—kusum, kusans*; in WGer. with development of *z* to *r*, *kios-, kaus* (OS. and OHG. *kōs*)—*kuri—kurum, koran*, whence OE. *céosan, céas—cure—curon, coren* (with *c* palatal in *céosan, céas*, but guttural in *cur-, cor-*). Hence regularly in ME., *cheose chēse*, with close *ē*), *cheas* (*chēs*, with open *ē*)—2 sing. *cure*,—pl. *curen, coren*. The first change upon this was the levelling of the consonant differences in the pa. pple. *coren*, which (though retained as *corn, core*, in S.W. dial. to 15th c.) was by 1200 assimilated to the general consonantism of the vb. as *chosen* (perh. through an intermed. *choren*: cf. *chure* in 2 s. pret); this was subseq. often reduced to *chose*, but the full form is the survivor. By assimilation to this the pl. pret. *curen* became *chosen*, and in due course *chose*, still used. The prevalent ME. form of the pret. sing. was *chēs*; but there was also *chās*, app. repr. OE. *cēās*, for *céas*. In later ME., and esp. in north. and n. midl. dial., these were also used for the pl and by similar levelling the pl. *chose* was also used as sing., app. only after 1500, and is now the standard form. In the pres. stem, OE. *céose*, early ME. *chéose*, normally gave *chēse, cheese*, which survived to *c* 1500, and later in Sc. But a type *chōse* appears in the 14th c. and lasted till *c* 1575 (in More, Coverdale, Ascham); before 1550 the type *choose* is found. Probably ME. *chōse* represented OE. *cēose*, for *céose*, and regularly passed into *choose*: cf. *lose*, in later pronunciation (lūz). The chief difficulty attaches to the type *chure*. This was no mere variant spelling of *choose*, but a much earlier form, which occurs somewhat sporadically in ME., but became very frequent in 16th c. (when it rimed with *amuse, refuse, excuse*). *Choose* and *chuse* are used indiscriminately in the Bible of 1611 and the First Folio of Shakspere: *chuse* was by far the prevailing form in 17-18th c., but has in the 19th been gradually superseded by *choose*, which Dr. Johnson, following Bailey, took as his leading Dictionary form, although in his own practice he appears to have spelt *chuse*.

(All other words in *-use*, as *abuse, accuse, amuse, refuse, ruse*, are of Fr. origin; and in some Sc. dialects *chuse* has still the sound of Fr *u*. Of OF. *choisir*, Littré gives Picard forms *kensir*, Walloon *chūzi*, Rouchi *chusir*.)

On these various types of the present stem were formed weak types of the pa. t., *chesed, chosed, choosed, chused*, used alongside of the various strong forms already mentioned; none of them are now recognized in standard English, though some exist in the dialects. Perhaps these were in some measure due to a tendency to identify the Eng. verb with the F. *choisir*—a tendency which is distinctly marked in the rise of the by-form Choise, *choised*, formerly used in English, and still the ordinary word for *choose* in the South of Scotland.]

The complicated nature of these facts makes it necessary to illustrate the Forms apart from the sense-development.

A. Illustration of the Forms.

Chop (tʃɒp), *v.*1 Also 4-7 **choppe**, (5-6 **schoppe**, 6 **chopp**, 7 **chope**). [Another form of Chap *v.*1 The evidence of the quotations as to their relative priority in date is not decisive, nor is any trace of the word in either form to be found in OE., or in the older stages of Teutonic. *Chap* coincides in sense with Du. *kappen* to chop, cut, mince, hew, lop, prune, late MDu. *cappen* to hew off, chop off, LG. (whence mod.G.) *kappen*, Da. *kappe*, Sw. *kappa* to cut, chop. But the type to which these point is **kappōn*, OTeut. **kappōjan*, and this would app. have given in OE. only **cappian*, since *a* before double stops followed by guttural vowel, did not give *æ* in primitive OE. This again would have given ME. and modern **cap*; while the OE. type of *chap* would be **ceappian*, **cæppian*. Thus, the relationship of the Eng. to the continental words cannot, at present, be made out.

Chop and *chap* were subsequently somewhat differentiated, *chop* becoming the proper word for branches I and II, while III and IV are left to *chap*. In some respects, the use of the *chop* forms, esp. in the sb. (sense 2), suggests influence of F. *couper*, in 13-15th c. often *coper*; but whether the latter had, or could have, any influence on the rise or currency of the form *chop* is problematical.]

V. In various uses this verb and the next appear to run together, and produce senses which combine the two notions of 'striking', or suddenly moving in any direction, with that of 'turning' as in the chopping of the wind. Thus a fox is said to *chop back* and double; a mineral vein *chops up, down, back*, etc.

Chop (tʃɒp), *v.*2 Also 5–7 **choppe**. [Appears bef. 1400 in the appellation *choppe-churche*, which implies earlier use of the vb., though the latter has been found first, in the phrase 'to choppe and change', late in the 15th c. The history is not clear, but as CHAP was of occasional earlier use in the same sense, it is not improbable that *chop* was merely a variant due to the circumstance that other words of the same form varied between *chop* and *chap*. There appears little reason to think that the Flemish *koopen, koopen*, to sell, or its Eng. form *cope*, or the ON. *kaupa*, or its Sc. form *coup*, had anything to do with the origin of *chop*. The difference between (kɔp) and (tʃɒp) is great.]

Chouse (tʃaus), *sb.* Also 7 **chiaus(e, chews, showse,** 7–8 **chowse.** [Generally taken to be the same word as CHIAUS, *chaus* (so spelt about 1600), a Turkish official messenger; but the connexion of meaning is not made out.

As to the origin of the Eng. use, Gifford (1814) in a note on the quot. from Ben Jonson says, 'In 1609, Sir Robt. Shirley sent a messenger or *chiaus* to this country as his agent from the Grand Signior and the Sophy to transact some preparatory business.' The latter 'chiaused the Turkish and Persian merchants of £4,000' and decamped. But no trace of this incident has yet been found outside of Gifford's note; it was unknown to Peter Whalley, a previous editor of Ben Jonson 1756; also to Skinner, Henshaw, Dr. Johnson, Todd, and others who discussed the history of the word. Yet most of these recognized the likeness of *chouse* to the Turkish word, which Henshaw even proposed as the etymon, on the ground that the Turkish chiaus 'is little better than a fool'. Gifford's note must therefore be taken with reserve.]

Chowder (tʃau·dəɹ), *sb.* Also 8 **chouder.** [App. of French origin, from *chaudière* pot. In the fishing villages of Brittany (according to a writer in *N. & Q.* 4 Ser. VII. 85) *faire la chaudière* means to supply a cauldron in which is cooked a mess of fish and biscuit with some savoury condiments, a hodge-podge contributed by the fishermen themselves, each of whom in return receives his share of the prepared dish. The Breton fishermen probably carried the custom to Newfoundland, long famous for its chowder, whence it has spread to Nova Scotia, New Brunswick, and New England.

Another writer in *N. & Q.* (1870) 4 Ser. V. 261, says 'I have frequently heard some of the old inhabitants [of Newfoundland] speak of Commodore John Elliot's chowder pic-nic in 1786, which was given in honour of H. R. H. Prince William Henry [William IV] in command of H. M. S. Pegasus upon the Newfoundland station'.]

[Represents (originally through OF. *crestienté*), L. *christiānitāt-em*, noun of state f. *christiān-us* CHRISTIAN; having taken the place in whole or part of the native formations ME. *cristenhode* and *cristendom*. Apart from the merely graphic refashioning of *cr-* as *chr-* at the Renascence, the word has had three types, *cristienté* the most French, *cristentie* the most English, and *christianity* the most Latinized, which might fairly be treated as distinct words, except that, being connected by intermediate links, their relations are more clearly shown by considering them together. The type *cristienté* was a direct adoption of Anglo-Fr. *cristienté*, OF. *crestienté*: see CHRISTIAN. By further assimilation to the English *cristen*, *cristendom*, etc. (aided probably by the phonetic obscurity of the *-ien-*), arose *cristentē*, which was the most frequent ME. type. After 1500 both types were spelt with *ch-*. Already in the 14th c., familiarity with the Latin form as a word of the clergy, led to the occasional use of the 5-syllabic *cristianite*. With the Renascence this became *christianite, -itie, -ity*, which in the course of the 16th c. entirely supplanted the two earlier forms, though *christentie* lingered dialectally, and appears as *christendie* in Burns. *Christianity* and *Christendom* were originally synonyms, but are now differentiated.]

Christmas-box.

3. A present or gratuity given at Christmas: in Great Britain, usually confined to gratuities given to those who are supposed to have a vague claim upon the donor for services rendered to him as one of the general public by whom they are employed and paid, or as a customer of their legal employer; the undefined theory being that as they have done offices for this person, for which he has

not directly paid them, some direct acknowledgement is becoming at Christmas.

Thus, these gratuities are asked from householders by letter-carriers, policemen, lamp-lighters, scavengers, butchers' and bakers' boys, tradesmen's carmen, etc., and from tradesmen by the servants of households that deal with them, etc. They are thus practically identical with the Christmas-box collected by apprentices from their masters' customers in sense 1, exc. that the name is now given to the individual donation; and hence, vulgarly and in dialect use it is often equivalent to 'Christmas present.'

The OE. oblique forms *circan, -cean, circan, -cean*, present four types, **kirika*, **kirikja*, **kirka*, **kirkja*, but the two

last may result from later contraction, and *-cæn*, *-cæn* may mean the same thing, viz. palatal *c*. The continental German forms point to **kirika*, **kirika*. The Alemannic forms with *i*, *chtlikha*, *kilche* are on phonetic and other grounds admitted to have arisen out of the *r* type. The ON. is generally held to be derived from OE. (in the *circean* form). Although the notion has been advanced that all the continental forms originated in the OE., in connexion with the early missionary labours of Englishmen in Germany, this is philologically untenable; and the word is held on good grounds to be common WGer., and to go back at least to the 4th or 5th c. (Long before they became Christians, the Germans were naturally acquainted with, and had names for, all the striking phenomena of Christianity, as seen in the Roman provinces, and the missions outside.) In Slavonic, the word is generally thought to have been taken from Teutonic.

The ulterior derivation has been keenly disputed. The L. *circus*, and a Gothic word *kēlikn* 'tower, upper chamber' (app. originally Gaulish) have both been proposed (the latter suggested by the Alemannic *chtlikha*), but are set aside as untenable; and there is now a general agreement among scholars in referring it to the Greek word κυριακόν, properly adj. 'of the Lord, *dominicum*, dominical' (f. κύριος lord), which occurs, from the 3rd century at least, used substantively (sc. δῶμα, or the like) = 'house of the Lord', as a name of the Christian house of worship. Of this the earliest cited instances are in the *Apostolical Constitutions* (II. 59), *a* 300, the edict of Maximinus (303–13), cited by Eusebius (*Eccl. Hist.* IX. 10) *a* 324, the Councils of Ancyra 314 (Canon 15), Neo-Cæsarea 314–23 (Can. 5), and Laodicea (Can. 28). Thenceforward it appears to have been in fairly common use in the East: e.g., Constantine named several churches built by him κυριακά (Eusebius *De Laud. Const* xvii).

The chief objections to this derivation of the Teutonic (and Slavonic) name are the following. The ordinary name for 'church' in Gr. was ἐκκλησία, and this (or βασιλική, BASILICA) was the name which passed into Latin and all the Romanic langs.; also, into all the Celtic langs., OIr. *eclais*, Ir. and Gael. *eglais*, Manx *aeglish*, OWelsh *ecluis*, W. *eglwys*, Cornish *eglos*, *-es*, *-is*, Breton *iliz*. Hence, an *à priori* unlikelihood that any other Greek name should have passed into the Teutonic languages. Moreover, ἐκκλησία was actually adopted in Gothic, where as *aikklēsjō* it occurs in the N.T. many times. But as the sense here is not that of the place of public worship, but of the Christian society or assembly, it forms no evidence against the coexistence of a Gothic repr. of κυριακόν, in the sense of the 'Lord's house'. Besides, Ulphilas, as a native of Cappadocia, born A.D. 318, belonged to the very region and time for which we have the most weighty evidence of the use of κυριακόν, as mentioned above. And as to the other Teutonic tribes, the fact is certain, in spite of its *à priori* unlikelihood, that *ecclesia* was *not* accepted by them At their conversion, Latin Christianity would naturally have given to them, as to others, the name *ecclesia* (or *basilica*), if *kirika* had not already acquired too firm hold of the field.

There are points of difficulty in the form of *kirika* and its gender Its identification with κυριακόν assumes the representation of Gr. *υ* by *i* in Teutonic. Ulphilas did not so represent *υ*; nor did he use *u*, but retained the Gothic letter corresponding in alphabetic place and form to Gr. Y, which he otherwise used for *v* or *w*. But, before the development of umlaut, and consequent evolution of *y* as a Teutonic sound, *i* was really the nearest Teutonic sound to *υ*, and in point of fact is its usual representative. The change of grammatical form and gender has been variously explained: as εὐαγγέλιον became in Gothic a weak fem. *aiwaggēljō*, *-jōn*; so κυριακόν, if adopted in Gothic, or in the corresponding stage of WGer., would in the same way become **kyrjakō*, *-ōn*, whence regularly WGer. *-ka*, OE. *-ce*; but there are other instances in OHG. of feminines from L. *-um*, Gr. *-ον*, as *martira*, *organa*, modGer. *orgel*; and the form adopted may actually have been the Gr. pl. κύριακά. (The use of κυριακή in Gr. appears too late to affect the question.) For the rest, a word adopted in Germanic as **kirjak-* would phonetically become **kirjik-*, and this normally in WGer *kirik-*. Possibly also **kirjika* might, by metathesis, give the **kirikja* app. required for OE. *ciricean*; but the OE. palatalization might simply be due to the prec *i* as in *ic*, ME. *ich*, *I* pron.

The main objections are historical: we do not know the actual circumstances in which this less usual Gr. name became so well known to all the Germanic tribes as to become practically the native name, and like *austrōn-* EASTER, resist all the influence of Latin Christianity to supplant it; this too at so early a date as to be brought to Britain (with many words expressing the outward apparatus of Christianity) by the heathen Angles and Saxons. The question was discussed already in the 9th c. by Walafrid Strabo (ob. 849) in a noteworthy passage (*De Rebus Eccl.* viii), where, after giving the Greek derivation, he ascribes German knowledge and use of the word to the German mercenaries who engaged in military service under the Empire, and refers particularly to the Goths in the Greek provinces. Beside that of the Goths, two other possible channels are indicated by Hildebrand, one of which, connected with the early penetration of Christianity from the Rhone valley into the Upper Rhine, is important, as tallying with a statement of Irenæus, Bp. of Lyons in the 2nd c (*Adv. Hær.* I. x. § 2), and as explaining the proved existence of place-names like *Kiricheim*, *Chiricunuillare*, in Elsass, etc. before the days of Boniface. But it is by no means necessary that there should have been a single *kirika* in Germany itself; from 313 onward, Christian churches with their sacred vessels and ornaments were well-known objects of pillage to the German invaders of the Empire: if the first with which these made acquaintance, wherever situated, were called κυριακά, it would be quite sufficient to account for their familiarity with the word. The Angles and Saxons had seen and sacked Roman and British churches in Gaul and Britain for centuries before they had them of their own, and, we have every reason to believe, had known and spoken of them as *circean* during the whole of that period.

The Latin equivalent of κυριακόν, *dominicum*, was also in use at least from the time of Cyprian (*c* 200–258), in the sense of 'the house of God' *aedes sacra Domino*. To a certain extent it was adopted in Old Irish, where *domnach* (mod. *domhnach*) became a frequent name of churches. The parallelism of Gr. κυριακόν church, κυριακή Sunday (in 11th c. also 'church'), L. *dominicum* church, *dominica*, *dies dominicus* Sunday, Irish *domhnach* 'church' and 'Sunday', is instructive.

The case for the derivation from κυριακόν gains largely by the fact that no other conjecture offered will bear scientific statement, much less examination. For example, the suggestion that *cirice* might arise out of L. *crucea* (which actually gave OE. *cryce*(*e*, now *crutch*), or some other derivative of L. *crux*, *crucem* cross, is at variance with the simple facts of phonetic history.]

B. *Signification.*

While it results from what is stated above that *kirika*, *cirice*, was originally applied to the building, it is clear that with the conversion of the Teutonic nations, it was assumed as the naturalized equivalent of L. *ecclēsia*, and used for that word in all its senses. Naturally the first of these would be as the name of the then one great religious organization, the Catholic Church. and especially as represented by its ministers, the clergy or ecclesiastical order. The extension to other senses took place as these were practically recognized.

The history of the OE. *cirice*, or of the Teutonic *kirika*, is therefore not the history of the Church, or of its name in Christendom; this begins with the joint history of Gr. ἐκκλησία and its L. adoption *ecclēsia*; about which all that need be said here is that the Gr. word, meaning etymologically 'the body of the ἔκκλητοι or select counsellors' was the name given by Solon to the public formal assembly of the Athenian people, and hence to the similar public assemblies of other free Greek cities. By the LXX. it was used to transl. the Heb. קָהָל *qāhāl* the 'congregation' or assembly of Israel met before the Lord, or conceived in their relation to him. In the N.T. the word has a twofold sense: α. (after the LXX.) the whole congregation of the faithful, the Christian Society, conceived of as one organism, the body of Christ; β. (after classical Gr.), a particular local assembly of Christ's enfranchised met for solemn purposes: in this sense it has a plural. From these arose the later developments: the name of the assembly passed to that of the building set apart for it: the sense of 'the congregation of the faithful' sought visible embodiment in outward organization, which necessarily followed the lines of provincial, national and linguistic distinctions. Thus arose the notion of provincial or national Churches, as parts or branches of the Church universal or Catholic; and, with widening differences, doctrinal or administrative, there came the revolt of some of these from the increasingly centralized organization of the Catholic Church, and the formation of rival churches, each claiming to be *the* church and rejecting the claim of the others. Thus arose the first great division of the Eastern and Western Church, the later separation of various national 'reformed' churches from the unreformed Western Church in the 16th c., the secession of various 'free' or 'voluntary' churches from the reformed national or 'established' churches in later times. Some of these voluntary bodies have refused the name of 'church' to any 'denomination' or organization of congregations, confining it to the two senses of the Church universal, and an individual local society. The name has even come to be used to denote types or tendencies of thought or expression, within the one communion, as in the modern High Church, Low Church, Broad Church.

I. The building, the Lord's house

1. A building for public Christian worship. (Distinguished historically from a CHAPEL or ORATORY, which is a building in some respect private, or not public in the widest sense.)

Ancient distinctions, retained more or less in the Churches of England and Scotland, are those of CATHEDRAL, COLLEGIATE, ABBEY, and PARISH or *parochial*, church. (See also METROPOLITAN.) Any place of worship subordinate to the public church of the parish was formerly called CHAPEL (q.v.); but *parochial* and *district chapels* are now usually called 'Church'. In England the name has been only recently and partially extended to places of worship other than those of the national or 'Established' Church, as those of Roman Catholics (since *c* 1830–40) and some Nonconformist Protestants. At present, its application is partly a question of social or individual taste, or of ecclesiastical principle or theory, partly (in popular apprehension) of the size and architecture of the building. Thus, some would limit it to the historical place of worship of the parish, some extend it to all places of worship of that body which they recognize as 'The Church', and refuse it to all others; some would require the existence of certain features of ecclesiastical architecture. But, generally speaking, in England the question 'Is this a church or a chapel?' would at present be understood to mean 'Does it belong to the Church of England or to some other religious denomination?'

In Scotland, *church* is applied to all Presbyterian places of worship, alike of the Established Church, and of the various voluntary bodies which have separated from it. Recently also extended to the chapels of Episcopalians, Roman Catholics, Independents, and others generally.

In U. S. *church* is, in general use, applied to all places of worship. Episcopalians however sometimes claim it exclusively for their own; and other bodies in some cases use special names for their own buildings. In the British colonies generally, the usage of England and Scotland is combined, with more or less extension as in the U. S.

c. *Visible Church*: the church as visibly consisting of its professed members upon earth: contrasted with the *church invisible*, or *mystical*: see quots.

1561 *Conf. Faith Scotl.* xvi, This [the Catholik] Kirk is invisible, knowin onlie to God, who allone knoweth whome he hes chosin, and comprehendis alsweall the Elect that be departed, (commounlie called the Kirk Triumphant), as those that yit leve and feght against syne and Sathan. 1562 *Articles of Relig.* xix, The Visible Church of Christ is a congregation of faithful men, in the which the pure Word of God is preached, and the Sacraments be duly ministered according to Christ's ordinance in all those things that of necessity are requisite to the same. 1594 HOOKER *Eccl. c. *Established Church*: the Church as by law established in any country, as the public or state-recognized form of religion. Chiefly used of the Churches of England and Scotland respectively. So *State Church.*

6. The ecclesiastical and clerical organization of Christianity, or of a great Christian society, international, national, or other; *esp.* The clergy and officers of this society collectively or as a corporation having a continuous existence, and (in former times especially) as an estate of the realm. (In this sense 'Church' is often opposed to 'State' or the political organization, the civil government.)

(In early times *Holy church* was the common phrase in this sense: see 7.)

b. The clerical order or profession. Hence *to go into the Church*, to take holy orders, become a clergyman; so *to be in the Church, to leave the bar for the Church.*

7. *Holy church*: a title commonly given to the Church Catholic, regarded as a divinely instituted and guided institution, speaking with authority, through its accredited organs. In early times often = the clergy or ecclesiastical authority, as in 6.

8. *Mother Church*: a favourite appellation of the Catholic church and its recognized branches. In allusion to this, to *Song of Solomon*, to *Rev* xxi. 2, etc., the Church as an institution or corporation is often personified, and spoken of poetically and rhetorically as *she.*

Hist.* iv. § 6. 233 The church has expressed her sense of their errors.

9. *High, Low, Broad Church*: see these words.

Although *church* is here practically equivalent to 'church party', 'section of the church', it has acquired this force only contextually or by unthinking analysis of phrases in which *high church-*, *low church-* were used attributively, as in *high church-man* and the like. *Broad church* is a modern formation on the model of the other two, starting not from their starting-point, but from their current use.

III. 10. A congregation of Christians locally organized into a society for religious worship and spiritual purposes, under the direction of one set of spiritual office-bearers.

(The early examples of this, before 16th c., are perhaps all in translations of the N.T. or references thereto.)

V. In senses not distinctively Christian.

13. The congregation or company of God's people in pre-Christian times. **a.** *orig.* merely a translation of L. *ecclēsia*, Gr. *ἐκκλησία*, of the Vulgate and LXX., applied in its pre-Christian sense to the 'congregation' of Israel: see above. **b.** In later times, a retrospective use of the Christian sense, applied to the Israelites as God's chosen people, or to the faithful among them, and the worshippers of the true God or 'Old Testament saints' generally, as the analogue of the church under the Christian dispensation.

VI. *Attrib.* and in *Comb.*

15. *attrib.* There being no adjective from *church* in general use, and the genitive *church's* being restricted to the notion of possession (usually with more or less personification), as in 'the church's claims, revenues, ministrations', the place of both is supplied by using *church* attributively or with the function of an adjective, signifying 'of the church, of a church, of churches, ecclesiastical'. In such a use, the word is often hyphened, though the value of the hyphen is merely grammatical, in no way affecting the signification, and it may usually be omitted.

Church may be thus used in most of the senses above explained: in England it has specifically the sense 'of the Church of England'.

Church-scot, -shot. Modernized adaptation of OE. **ciric-sceat** [f. OE. *ciric-* church- + *sceat* money-payment, tribute, rate], in 12th c. **church-sceat,** which was subsequently, as an obsolete term, variously corrupted as 3 **chirchesset** (*ss – sh*), **-soht, 4 cherset**; and by legal antiquaries, 7 **churchesset, 7– church-seed.**

lit. — *Church-tribute*: in OE. times a custom of corn collected on St. Martin's day; extended to other contributions in kind and money made for the support of the clergy, or demanded as a traditional ecclesiastical due.

The desire to connect the latter part of the combination with *seed* appears as early as the 13th c, when the institution and name were alike traditionary; hence the corruptions found in 13th c. documents, in Latin translations of OE. documents, and in the 17th c. legal antiquaries. Modern writers sometimes use the OE. name. (See SCOT, SHOT.)

CI-. Since *c* before *i* (as before *e*) was palatalized in OE, and in due course written *ch-* in ME., it follows that all OE. words in *ci-*, that have left representatives, now appear in the foregoing section of CH-, (e.g. *chicken*, *chide*, *child*, *chill*, *chin*, *chirm*). As a consequence CI- now contains only non-Teutonic words which have entered the language during the Middle English or the modern period, chiefly from Latin directly or through French. (The sole exception is the word CINDER, as now spelt, for OE. and ME. *sinder*; which also owes its current spelling and inclusion among the *ci-* words to erroneous identification with French *cendre*, Latin *cinerem.*) The words in *cy-* are also non-Teutonic, being mostly modern and of Greek origin. In these combinations *c* has normally the sound of *s*; in the remaining combinations, CL-, CO-, CR-, CU-, *c* has, as in CA-, its original phonetic value of (k), and comprises original English, as well as later words from all sources.

sembling this seed-vessel. Sense 2 arose partly from confusion with sense 1, partly out of a mistaken derivation from L. *cibus* food (Ugutio, 'ciborium vas ad ferendos cibos', Du Cange), in accordance with which it also occurs in med.L. as *cibarium*.

(The κιβώριον contained the 'nuts' or fruits called κύαμοι αἰγύπτιοι, *faba ægyptiaca*, or Egyptian beans; the rhizome or 'root' of the plant was called κολοκασία; both these names were also extended to the plant as a whole.)]

-cide (səid), *suffix.*

1. a. F. *-cide*, L. *-cida* cutter, killer, slayer, f. *cædĕre*, in comp. *-cīdĕre* to cut, kill, as in *homicīda, parricīda, mātricīda, frātricīda, sorōricīda, tyrannicīda*, etc., slayer of a man, father, mother, brother, sister, tyrant, etc.; also *lapi(di)cīda*, stone-cutter, etc. Most of the L. words having the sense 'slayer, murderer', have come down into Romanic and English, where new combinations have also been formed on the same type, notably *regicide* and *suicide*; *filicide* has also been used; and many occasional forms appear as jocose nonce-words, e.g. *apicide, avicide, canicide, ceticide, muricide, perdricide, tauricide, vaticide, verbicide*; or, still more ludicrously, *birdicide, prenticecide, suitorcide*, etc.

2. a. F. *-cide*, L. *-cīdium* cutting, killing, of same deriv. as 1; and, as the name of the action, possible wherever the name of the actor in *-cīda* was in use; e. g. *homicīdium, parricīdium, mātricīdium*, etc.; also sometimes independently as in *bōvicīdium* slaughter of oxen, etc. In English, as generally used as sense 1, the two implying each other, as in 'the parricide is he who commits parricide', etc.

OF. *sidre* (now *cidre*), corresp. to It. *sidro, cidro*; Sp. *sidra* fem., OSp. *sisa.* Although the phonetic history of the word in Romanic presents difficulties, there can be no doubt that it represents late L. *sicera* (med.L. *cisara, cisera*), Gr. σίκερα, a word used by the LXX, the Vulgate, and Christian writers to translate Heb. שֵׁכָר *shēkār* intoxicating liquor, 'strong drink', of the O.T., f. *shākar* to drink deeply or to intoxication. It is not clear where or how the phonetic change from *sicera* to *sidra* took place; but perh. the intermediate link was *sisra* (*sitra, sidra*): cf. F. *ladre* from *Lazarus.* In common use *cidre* had already acquired the sense of 'fermented drink made from apples' before it was taken into English. But the earlier sense of 'strong drink' generally was retained in translation of, and allusions to, the Vulgate; and in this sense the word had often forms much nearer to the Latin, as *ciser, cisar, cyser, seser*: these forms are not used in the sense 'cider': see Sicer.]

Cigar, segar (sigā·ɹ). Forms: 8 seegar, segar, seguar (sagar), 8–9 segar, 9 cigarre, cigar. [ad. Sp. *cigarro*: in F. *cigare*.

The Spanish word appears not to be from any lang. of W. Indies. Its close formal affinity to Sp. *cigarra* 'cicada', naturally suggests its formation from that word, esp. as derivatives often differ merely in gender. Barcia, *Great Etymol. Spanish Dict.*, says 'el cigarro figura una cigarra de papel' (the cigar has the form of a cicada of paper). Malin also thinks that the roll of tobacco leaf was compared to the body of the insect, which is cylindrical with a conical apex. The name *cigarral* applied to a kind of pleasure-garden and summer-house (as in the cigarrales of Toledo), which has sometimes been pressed into service in discussing the etymology, is said by Barcia, after P. Guadio, to be related neither to *cigarra* nor *cigarro*, but to be of Arabic origin meaning 'little house' (*casa pequeña*). It is said however to be applied in Cuba to a tobacco garden or nursery.]

On the ground that Linnæus's form *Cinchona* was due to erroneous information, it has been proposed to alter it to *Chinchona*; but the accepted form is too deeply rooted in botanical and chemical nomenclature to make this expedient. The word has no etymological connexion with *quina*, which is Peruvian for 'bark': see however CHINA 3.]

Cinque Ports. [In 13th c. *sink pors* repr. OF. *cink porz*, Latin *quinque portus*, five ports.] A group of sea-ports (originally five, whence the name) situated on the south-east coast of England, and having jurisdiction along the coast continuously from Seaford in Sussex, to Birchington near Margate, including also Faversham, which have existed as an incorporation from an early period of English history.

The five 'Ports' are in order of precedence Hastings, Sandwich, Dover, Romney, Hithe, to which were added in very early times the 'Ancient Towns' of Rye and Winchelsea, with all the privileges of 'Ports'. Several of these have detached 'Members', of which Seaford, Pevensea, Fordwich, Folkstone, Faversham, Lydd, Tenterden, Deal, and Margate, are 'Corporate Towns' with the same jurisdiction and municipal functions as the parent Ports.

In ancient times the Cinque Ports furnished the chief part of the English navy, in return for which they had many important privileges and franchises. These were mostly abolished by the Reform Act of 1832 and the Corporation Act of 1835. The Lord Wardenship is now chiefly an honorary dignity, and is usually conjoined with that of Governor of Dover Castle. See Vol. 1 of the Census Returns for 1871, and M. Burrows *Cinque Ports.*

‖ **Circulus** (sɔ:'kiʊlŏs). The Latin word for 'circle, ring'; formerly often used in Anatomy, Astronomy, and other sciences; also as a technical name of various instruments in Surgery, etc.; a tool for cutting circular portions of glass, also 'for cutting off the necks of glass-ware' (Knight).

Circum- (sə1kŭm). A Latin adv. and prep. meaning 'around, round about', much used in composition with verbs, and hence with the sbs. and adjs. formed from them, as in *circumambulāre* to walk about, *circumflectĕre* to bend round, *circumflexus* bent round, *circumflexio* a bending round, etc. Only a few of these survived in OF. (e. g. *circoncire* to circumcise, *circonscrire* to circumscribe) and passed thence into Eng. (with *circon-*, *circun-*, *circum*); but a large number of words adopted from or formed on the Latin, or in accordance with L. analogies, have arisen in modern French, and still more in English, where the analogy has occasionally been extended by prefixing *circum-*, as a living element, to native or naturalized verbs ; e. g. *circumbind*, *circumflow*, *circumzoned*.

A much rarer Latin use (which was however common in Gr. with *περί*) was in parasynthetic derivatives from *circum* prep. + *sb.*, forming adjectives, as in *circumpadānus*, (f. *circum Padum*) lying round the Po, *circummurānus* around the walls, *circumforāneus* around the forum, *circumcordālis* Tertull. = *περικάρδιος*, around the heart. This has proved a fruitful analogy for modern compounds, e. g. *circumpolar*, *circumlittoral*, etc.

All important words in *circum-* will be found in their alphabetical places as main-words ; but a number of less important or trivial words are collected here, under their respective types.

Circumflex (sɔ̃·ɹkʊ̆mfleks), *a.* and *sb.* [As adj., ad. L. *circumflex-us* bent about, pa. pple of *circumflectĕre*; as applied to the accent, it translated Gr. *περισπώμεν-ος*, lit. 'drawn around', in reference to its shape. The sb. is partly an absolute use of the adj., partly (senses 2, 3) repr. L. *circumflexu-s* a bending round.]

A. *adj.*

1. *Gram.* A word meaning literally 'bent round' applied to an accent-mark ˋ, ˆ, or ˜, placed, originally in Greek, over long vowels having a particular accent or 'tone' (see Accent 1); and thence transferred to other languages as a mark of length, of contraction, or of a particular variety of long vowel. Sometimes also applied to the tone, quantity, or quality indicated by this mark.

The Greek *περισπώμενος* was used by Dionysius of Halicarnassus, B.C. 30 (*περισπώμενα λέξεις*). According to Arcadius *περὶ τόνων* (*c* 200 A.D.), prob. copying Herodian (*c* 150 A.D.), the sign and name are both attributed to Aristophanes of Byzantium (*c* 264 B.C.). The original mark is said to have been ^ a combination of ˊ and ˋ, and hence called *ὀξυβάρεια*, for which however Aristophanes is said to have substituted ^ to avoid confusion of ^ with Lambda (Λ). This statement proves at least that the rounded form was the common one *c* 200. In our oldest accented texts (7–9th c.) both forms ^ and ˆ exist, but the rounded form prevailed, and by later scribes was turned up with a flourish, thus ˜.

The Latin grammarians of 2–3d c. call the mark *circumflexus*, and generally agree as to its shape being ^ (exc. Capella who used ˆ); but it was not actually used in writing Latin till modern times, when sometimes introduced to indicate contraction as in *amdrunt* for *amaverunt*, or in the ablative sing. in -*â*. In recent times also it has been introduced in French to mark a long vowel, chiefly due to contraction, as in *bête* from *beste*. The circumflex used in normalized printing of Old High German, and other Teutonic langs., to express long quantity, originated in an acute accent ˊ (as in O.E.), which being thus made ˆ, has been confounded with the Romanized form of the circumflex.

In modern English use the mark has no definite value, but is variously used by orthoepists or phonetists to mark long quantity, 'broad' quality, or the like.

a 1577 Gascoigne *Wks.* (1587) D j b, The grave accent is marked by this caract ˋ, the light accent is noted thus ˊ, and the circumflex, or indifferent is thus signified ˜. 1589 Puttenham *Eng. Poesie* II. vi [vii.] (Arb.) 92 Called the circumflex, or compast accent: and if new termes were not odious, we might very properly call him the (windabout) for so is the Greek word. *c* 1620 A. Hume *Brit. Tongue* (1865) 22 The circumflex accent both liftes and felles the syllab that it possesseth, and combynes the markes of other tuse, thus ^. 1871 Roby *Lat. Gram.* I. xiii. 98 The Romans distinguish between an acute and a circumflex accent.

1. A curve of the second order invented by Diocles.

If from any two points lying on a fixed diameter of a circle, and equidistant from the centre, perpendiculars be drawn to the circumference, and a straight line be drawn from one extremity of the diameter to that of either perpendicular, the locus of the point in which this straight line cuts the other perpendicular will be a *cissoid of Diocles*, having its cusp at the end of the diameter. In later times the term has been extended to curves similarly described, where the generating curve is not a circle.

‖ **Cithara** (si·pără). [L. *cithara,* a. Gr. *κιθάρα.*

Musical instruments are subject to great alteration of structure and shape, in process of time, and in different countries. Some of the resulting types become peculiar to one country, some to another. Consequently, cognate names, regularly descended from the same original, come at length to be applied by different nations to very different types of the instrument. Sometimes, also, one or more derivative types, distinguished by diminutive or augmentative names, are used in the same country. When, as often happens, any of these national or local forms of the instrument become subsequently known and introduced in another country, they usually take their local name with them. Hence, the modern languages often use two or three modifications of the same original word applied to as many instruments which different peoples have developed out of the original type. Thus *cither, cithern* or *cittern, citole, gittern, guitar, sither,* are all found in English as names of extant or obsolete instruments developed from the *cithara.*]

1. The Latin name of the citron-tree, now used as the name of the genus which includes the citron, lemon, lime, orange, shaddock, and their many varieties.

It is still a question how many of these are specifically distinct. Lindley inclined to consider the whole as long-established varieties of the citron *Citrus Medica*. Hooker reckons about 5 good species, viz. *C. Medica* citron (with *C. Limonum* lemon, and *C. Limetta* sweet lime, as varieties or sub-species), *C. Aurantium* orange, *C. decumana* shaddock, and two others. The native region of these appears to be northern India, esp. about the eastern end of the Himalayas. The earliest known in the west was the citron, cultivated by the 4th c. B.C. in Western Asia, whence it was obtained by the ancient Greeks and Romans. The orange and lemon were found in India by the Arabs, and by them carried westward, reaching Southern Europe about the 12th or 13th c.

[ME. *cite*, a. OF. *cité*, earlier *citet*, corresp. to Pr. *ciptat*, It. *città*, earlier *cittade*, Romanic **civ'tade*:—L. *cīvitāt-em*. By another phonetic pro-

cess the Romanic type gave Pr. and Cat. *ciutat*, Sp. *ciudad*, Pg. *cidade*. L. *cīvitās*, *-tātem* was sb. of state or condition f. *cīvis* citizen: its primary sense was therefore 'citizenship'; thence concretely 'the body of citizens, the community'; only in later times was the word taken as = *urbs*, the town or place occupied by the community. The historical relation between the Roman *cīvitās* and *cīvis* was thus the reverse of that between our *city* and *citizen*, which however is that of the Gr. πόλις and πολίτης.]

The name *civitas* was applied by the Romans to each of the independent states or tribes of Gaul; in later times it adhered to the chief town of each of these states, which usually became afterwards the seat of civil government and of episcopal authority. Though there were *civitates* in Britain also in Roman times, the word was not adopted by the Angles and Saxons, who applied the name *burh* to all towns alike. In later times *civitas* may be found as a Latin equivalent of *burh*, and, in Domesday, it is frequently applied to the larger and more important *byriz*, *burȝes*, or *boroughs*, which were the centres of districts, and had in some cases municipal autonomy, and thus corresponded in character to the *cités* of France. As an English word, *cité* is found early in the 13th c., applied, both to foreign, and particularly ancient cities, where it is probably due to translation from Latin or French, and also to important English boroughs, such as London and Lincoln. Under the Norman kings, the episcopal sees, which were formerly often established in villages, began to be removed to the chief borough or 'city' of the diocese, as in France; and as the bishops thus went to the cities, there grew up a notion of identification between 'city' and 'cathedral town'; which was confirmed and legally countenanced when, on the establishment of the new bishoprics by Henry VIII, the boroughs in which they were set up were created 'cities'. The same title has been conferred on all (or nearly all) the places to which new bishoprics have been assigned in the 19th c. Historians and legal antiquaries have, however, always pointed out that there is no necessary connexion of 'city' with 'cathedral town', and in recent times the style and rank of 'city' have begun to be conferred by royal authority on large and important boroughs which are not episcopal seats, Birmingham being the first so distinguished in England. (See Freeman in *Macmillan's Mag.*, May 1889.)

In Scotland, the style of *civitas* appears to have been introduced from England, after the association of the word with the episcopal seats. Here, it appears to have had no relation to the size, civil importance, or municipal standing of the place, but was freely applied in charters from the time of David I (12th c.) to every bishop's seat, even when a mere hamlet; it was only at much later dates that some of these *civitates* attained sufficient importance to be raised to the rank of burghs, while others remained villages. In later times, perh. not before the Reformation, *civitas* is found applied to Perth and Edinburgh, which were not episcopal seats, but ancient royal burghs, and seats of royalty. The vernacular form 'city' is found in the 15th c. applied to some of the burghs which were *civitates*, and it gradually came to be commonly used of certain of the larger of these, notably Edinburgh, Glasgow, Perth, and Aberdeen. In this sense, the royal burgh of Dundee was also created a 'city' by Royal Charter in 1889. Some of the other burghs which were formerly bishop's seats, or can show *civitas* in their early charters, have in recent times claimed or assumed the style of 'city', though not generally so regarded.

The history of the word in Ireland is somewhat parallel. Probably all or most of the places having bishops have been styled on some occasion *civitas*; but some of these are mere hamlets, and the term 'city' is currently applied only to a few of them which are ancient and important boroughs. *Thom's Directory* applies it to Dublin, Cork, Londonderry, Limerick ('City of the violated treaty'), Kilkenny, and Waterford; also to Armagh and Cashel, but not to Tuam or Galway (though the latter is often called 'the City of the Tribes'). Belfast was, in 1888, created a 'city' by Royal Letters Patent.

In other lands now or formerly under British rule, 'city' is used sometimes more loosely, but often with more exact legal definition than in England. In North America it usually connotes municipal autonomy or organization of a more complete or higher kind than 'town'. See 2 d, e. In India it is applied titularly to the three Presidency capitals, and to all great towns of historic importance or note, as the seats of dynasties, etc., e.g. Benares, Delhi, Agra, Lucknow, Indore, Peshawur, etc.

The distinction is unknown to other Teutonic and (now) also to Romanic languages: Ger. *stadt*, F *ville*, It. *citta*, Sp. *ciudade*, etc., translate both town and city.

I. †**1.** *orig.* A town or other inhabited place. Not a native designation, but app. at first a somewhat grandiose title, used instead of the OE. *burh*, BOROUGH. Frequently applied (after *civitas* of the Vulgate = πόλις of N. T. & LXX.) to places mentioned in the Bible which were really mere villages, *e g.* Nazareth, Nain, Bethlehem; here, as a literalism of translation, it still stands in Bible versions.

The earlier Wyclifite version had regularly *burȝ toun*, *borow toun*; for this the later version (Purvey's) substituted *citee*. Only in Esther ix. 19 do we find *borow townes*, and in Gen. xiii. 12 *townes* retained.

b. In England (see the historical sketch above).

The title appears to be properly relative to 'town', not to 'borough'. 'Cities' and 'towns', possessing a municipal corporation and local autonomy, are alike 'boroughs', though those boroughs which are also cities may take precedence of those which are not.

d. in *U. S.*: 'A town or collective body of inhabitants incorporated and governed by a mayor and aldermen' (Webster); but applied, in the newer States, much more loosely (see quots.), and often given in anticipation.

The legal characteristics of a city vary in different states. In some, e.g. Iowa, there are 'cities of the first class' with above 15,000 inhabitants, 'cities of the second class' with above 2,000, and 'incorporated towns', differing respectively in the complexity of their municipal organization, division into wards, and extent of municipal powers.

e. In the dominion of Canada: a municipality of the highest class.

Variously used in different provinces. In Ontario, a village, on its population exceeding 2,000, has a right to be made a 'town', with Mayor and Councillors; a town, on reaching 15,000, has a right to be erected into a 'city', whereby it is separated from the jurisdiction of the County Council, and has a Mayor and Aldermen (instead of Councillors); but towns of smaller population have also been erected into cities, by special acts of the legislature. In Quebec 'town' (= F. *ville*) is the normal title for a place with municipal autonomy, but six places have been incorporated by the legislature as 'cities', and have Aldermen, in addition to their Mayor and Councillors. In New Brunswick and Nova Scotia, the term appears to be titular, and conferred by special charter. In Manitoba it does not exist, 'town' (= F. *ville*) being alone recognized. In British Columbia, on the other hand, there are no 'towns', only 'city' and 'township or district' being legally recognized, the former having a Mayor, the latter a Reeve.

Clang (klæŋ), *sb.* Also 7 **clangue.** [Found first late in 16th c.; app. formed immediately from, or in conjunction with, Clang *v.*[1] Cf. L. *clangor* 'sound of a trumpet, shrill scream of birds', which were also the earliest senses of *clang*. (Thence also F. *clangueur*, and *clangueux* adj. 'loudly ringing'. Cotgr.). The Latin vb. and sb. were prob. etymologically cognate with Gr. κλᾰ́ζειν, κλαγγή, in same senses; but Ger. *klang* 'sound, musical sound' (MHG. *klanc* (*klanges*), OHG. *chlang*) is not related to these, being an echoic word which has separately arisen in German. No trace of any such word is known in OE. or ME.; see however Clank. The adoption and use of *clang* in modern English have doubtless been greatly influenced by the echoic nature of the word, by which it is associated directly with certain sounds, independently of its derivation; cf. *clang-clang, cling-clang*, as imitations of the sound of a bell. From this cause also the central sense of *clang* has now shifted from that of L. *clangor*; on the other hand, some writers have used it as identical with Gr. κλαγγή or Ger. *klang* above mentioned.]

But the evidence of the OE. vocabulary and Leechdoms supports the antiquity of *sclarea*, without throwing any light upon its origin or history. In the 16th c. *clarey* was solved by the apothecaries into *clair-ye, clear-eye*, translated *Oculus christi, Godes-eie*, and *See-bright*, and eye-salves made of it (Prior), on the strength of this supposed derivation.]

Clash (klæʃ), *sb.* Also 6 **clasche, classhe.** [This and the associated verb are first found about 1500, and appear to be onomatopœic; arising, in the main, from instinctive association with classes of pre-existing echoic words. The initial element is that of *clap, clack*, etc.; the final that of *dash, splash, smash, swash*, etc., or perhaps a direct imitation of the element of sound common to these. *Clash* thus suggests an action produced in the same way as a *clap* or *clack*, which, instead of abruptly ending like these, is broken down as it were into, and results in, a mingled mass of smashing or rustling sounds. A parallel relation exists in *crack, crash*, perh. in *smack, smash*, and in the dial. *swack, swash*; cf. also *bash, blash, brash*, as instances of words having a kindred element of form and signification. There is no *phonetic* relation between *clack* and *clash*; i. e. no way by which *-ash* could have been developed (in English) out of *-ack* by the mere operation of phonetic processes.]

Clasp (klɑsp), *sb.* Forms: 4–6 **claspe,** 5 **clospe, clespe,** 5–7 **clapse,** (6 **glaspe**), 7, 9 *dial.* **claps,** 4– **clasp.** [This, and the vb. of same form, appear in 14th c. Priority in time is given by our quots. to the sb., the etymological priority of which is also favoured by their general tenor. From an early date the form *claspe* varies with *clapse* (still used in southern dialects), but the evidence fails to show which is the original. No trace of either form is found outside English; and the origin is entirely a matter of conjecture. Senses 1–2 appear to have been the source of the vb., and senses 3–6 in turn to have been influenced by or wholly taken from the vb.

The sb. in its latter part recalls Hasp, or *haspe* (OE. *hæpse*, ON. *hespe* a clasp, or fastening); also MLG. and MDu. *gaspe, gespe*, Du. *gesp*, clasp, buckle. (Wedgwood suggests direct imitation of the sound of a metal fastening, as when we speak of the *snap* of a bracelet.) Whether *clapse* (if this were the original form) could be formed in some way from, or influenced by, Clip *v.* (OE. *clyppan*) to embrace, *complecti, amplecti*, appears doubtful, inasmuch as this meaning is little applicable to the primary senses of the sb., and appears to have been a later development in the vb., whence it was taken back into later senses of the sb.]

3. A division of the scholars or students of an institution, receiving the same instruction or ranked together as of the same standing. Also, the assembling or attendance of such a body; the instruction, lessons, or course of lectures given thereat.

In English Grammar Schools the traditional and conventional division is into Six *Forms* numbered from the lowest upward. In large schools these are for practical purposes often subdivided into lower, middle, and upper or other divisions, which are really distinct classes. The number of *Classes*, on the contrary, when this term is used, is unlimited, and they are usually reckoned from the highest downward.

Also *class day*, etc.: see 10.

Classic (klæ·sik), *a.* and *sb.* [ad. F. *classique*, or L. *classic-us* of the highest class, of the first order, f. *classis*: see Class *sb.* and -ic.

Gellius has 'classicus .. scriptor, non proletarius', where the word means 'high-class', as opposed to 'low' (cf. *proletarius sermo*, Plautus), and this is the main sense of *classique* in Cotgr., as well as in our earliest examples. Littré however takes as his first sense of *classique* 'Used in or belonging to the classes of colleges or schools'; and it is probable that this notion has influenced the word in its extension to the ancient authors generally, as studied in school or college, together with the associated languages, literature, history, geography, mythology, art, etc. It is probable, also, that the transference of the epithet from the first-class or standard writers in Greek and Latin to these languages themselves has been partly owing to the notion that the latter are intrinsically excellent or of the first order, in comparison with the modern tongues. But the extension has probably been in the main unthinking and unanalysed: the Greek and Roman authors read in school were actually the classical writers in these languages, and thus 'classic' became practically synonymous with 'ancient Greek or Roman'. Cf. also the modern L. *locus classicus*, the passage of first-rate authority or importance.]
